

10 Innovative Materials Unveiled at the Proceedings of the Fourth International Conference on Inventive Material Science

The Proceedings of the Fourth International Conference on Inventive Material Science recently concluded, bringing together scientists, researchers, and innovators from around the world. The conference served as a platform to present groundbreaking materials and discuss their potential applications in various industries.

Proceedings of Fourth International Conference on Inventive Material Science Applications

ICIMA 2021

Series: **Advances in Sustainability Science and Technology**

- Presents research works in the field of electronic materials and applications
- Provides original works presented at ICIMA 2021 held in Coimbatore, India
- Serves as a reference for researchers and practitioners in academia and industry

The volume is a collection of best selected research papers presented at the 4th International Conference on Inventive Material Science Applications (ICIMA 2021) organized by PPG Institute of Technology, Coimbatore, India during 14 – 15 May 2021. The book includes original research by material science researchers towards developing a compact and efficient functional elements and structures for micro, nano and optoelectronic applications. The book covers important topics like nanomaterials and devices, optoelectronics, sustainable electronic materials, nanocomposites and nanostructures, hybrid electronic materials, medical electronics, computational material science, wearable electronic devices and models, and optical/nano-sensors.

Order online at springer.com / or for the Americas call (toll free) 1-800-SPRINGER /
or email us at: customerservice@springernature.com / For outside the Americas call +49 (0) 6221-345-4302 /
or email us at: customerservice@springernature.com
