Understanding the Science Behind Acne

Acne is typically caused by a combination of factors, including excess oil production, clogged pores, bacteria, and inflammation. Red Lowery's method addresses each of these components, leading to long-lasting results.

The Four Pillars of Red Lowery's Method

1. Cleanse and Exfoliate

The first step in eliminating zits is to thoroughly cleanse your skin and remove any impurities. Red Lowery's recommended cleansers and exfoliators are specially formulated to unclog pores and eliminate dead skin cells, preventing breakouts.

2. Oil Control

Excess oil production is one of the primary causes of acne. Red Lowery's method includes oil-controlling products that help balance the skin's natural oil levels, reducing the likelihood of clogged pores.

3. Antibacterial Treatment

To combat the bacteria that contribute to zits, Red Lowery has developed an antibiotic treatment that effectively kills the harmful microbes while leaving the

skin healthy and nourished.

4. Soothing Inflammation

Inflammation can make existing zits more noticeable and worsen their appearance. Red Lowery's method includes calming ingredients that reduce redness and inflammation, promoting a clear and even complexion.
