LightQuest is a startling new way to embrace and investigate the UFO phenomenon. Since the modern flying saucer era began in 1947 we have been conditioned to see UFOs as interplanetary craft and their occupants either as intergalactic ambassadors or invaders from space. Tales of crashed saucers,

ancient aliens, crop circles, and alien abductions dominate UFO literature and media presentations, but has this led us astray? Evidence now points to UFOs, mystery lights, and alien intelligences being far more exotic than we have ever imagined. They now can be seen as sentient energy forms and complex plasma constructs manifestations of a higher dimensional reality that has co-existed with the human race since time immemorial, and was in the past seen as the Realm of Faerie. This book embraces a new understanding of the UFO phenomenon by accepting that its existence is deeply rooted in everything from quantum entanglement to multi-dimensional experiences, strange worlds that interpenetrate our own, and psychic communications. Even the alien abduction is described, defined and clearly understood for the first time. LightQuest is also a field guide to some of Britain and the United States' top UFO hotspots: where to go, what to do, and what exactly you might expect to see there. It also includes a creative visualization to be used by light questers worldwide to commune with the light intelligences in the hope of drawing them into manifestation. Some of the locations detailed include: Roswell, NM; Piedmont, MO; Marfa, TX; Allagash, ME; Brown Mountain, NC; Indian Head Rock, NH; Yakima/Mt. Adams, WA; Avebury, UK; Alton Barnes, UK; Warminster, UK; Aveley, UK; Peak District, UK; Rendlesham, UK; and the Dove Dale Valley, UK. Heavily illustrated throughout with numerous maps, photos and illustrations and includes an 8-page 24 color photo insert. Contains an extensive by Dr. Gregory L. Little that details the first university-based scientific field study of UFOs (researching UFO manifestations in Missouri as they actually occurred). This study, conducted in the 1970s, took place over 7 years and included over 35 physical scientists, engineers, and others utilizing sophisticated instrumentation. Nearly 160 viewing stations were employed and 157 documented sightings of 178 different UFOs were made. In addition, scientific studies of the Yakima, WA UFO reports are detailed along with the UK's Ministry of Defence Project Condign Report. UFOs are real, but they are something far more intriguing than beings from other worlds. The reality of UFO

experiences is undeniable-but our interpretations of them have been marred by the UFO field insisting that they must be extraterrestrial craft.
