### The Nationalizing Politics of Threat

Chicago, notorious for its intricate power dynamics, has long been associated with the nationalizing politics of threat. This concept revolves around leveraging perceived threats, whether domestic or international, to consolidate power and shape public opinion. By perpetuating a sense of urgency and crisis, politicians can exercise greater control over policy decisions and maintain their positions of influence.

Within the nationalizing politics of threat, Chicago stands at the epicenter of numerous controversies, from organized crime and corruption to racial tensions and economic disparities. These issues have been weaponized by political elites to garner support, project themselves as protectors, and funnel resources into their preferred agendas. Understanding the intricate web of threat narratives is essential to uncover the underlying power dynamics of Chicago and its broader influence on American politics.

### Executive Influence Unmasked in Chicago

Chicago serves as a microcosm of executive influence in American politics. The city's powerful political machine has enabled executive figures, such as mayors and influential businessmen, to exert control over various aspects of governance and policy. This concentrated power often extends well beyond the boundaries of Chicago, with those in positions of influence shaping national policies and debates.

One notable example is the infamous legacy of Mayor Richard J. Daley, who held office from 1955 to 1976. Daley's iron-fisted rule allowed him to consolidate power and influence through strategic alliances, patronage networks, and control over key resources. His reach extended far beyond Chicago, as he became a sought-after ally for presidential hopefuls and played a pivotal role in shaping national politics.

The case of Rahm Emanuel, the former mayor of Chicago and Chief of Staff under President Barack Obama, further highlights the influence wielded by executive figures. Emanuel's ability to navigate the complex Chicago political landscape enabled him to rise to positions of national importance, ultimately influencing policy decisions at the highest levels.

## **The Impact on the Nation**

Chicago's nationalizing politics of threat, intricately intertwined with executive influence, has far-reaching consequences. The city's issues and power dynamics serve as a litmus test for national policy approaches, shaping the narratives around crime, race relations, economic inequality, and more. National politicians, recognizing the influence of Chicago's political landscape, navigate its intricacies as they position themselves in the broader political landscape.

Furthermore, Chicago's political elites hold significant sway in shaping national agendas. Their influence on policy decisions, lobbying efforts, and campaign financing ensures that Chicago remains a stronghold of power, impacting the nation at large. The interplay between executive influence and the nationalizing politics of threat in Chicago becomes a blueprint for politicians seeking to establish their dominance and implement their desired policy agendas on a nationwide scale.

Understanding the complex dynamics of executive influence and the nationalizing politics of threat in Chicago is key to comprehending the broader power dynamics of American politics. By peeling back the layers of influence, one can reveal the hidden realities that shape policies and public opinion at both the local and national levels. Chicago's political landscape serves as a microcosm of American politics, highlighting the interplay between executive power, threat narratives, and the influence they wield. As we navigate the ever-evolving landscape of American politics, recognizing and dissecting these power dynamics is crucial to maintaining a truly democratic and transparent system.

“It is the nature of war to increase the executive at the expense of the legislative authority,” wrote Alexander Hamilton in the Federalist Papers. The balance of power between Congress and the president has been a powerful thread throughout American political thought since the time of the Founding Fathers. And yet, for all that has been written on the topic, we still lack a solid empirical or theoretical justification for Hamilton’s proposition.

For the first time, William G. Howell, Saul P. Jackman, and Jon C. Rogowski systematically analyze the question. Congress, they show, is more likely to defer to the president’s policy preferences when political debates center on national rather than local considerations. Thus, World War II and the post-9/11 wars in Afghanistan and Iraq significantly augmented presidential power, allowing the president to enact foreign and domestic policies that would have been unattainable in times of peace. But, contrary to popular belief, there are also times when war has little effect on a president’s influence in Congress. The Vietnam and Gulf Wars, for instance, did not nationalize our politics nearly so much, and presidential influence expanded only moderately.

Built on groundbreaking research, *The Wartime President* offers one of the most significant works ever written on the wartime powers presidents wield at home.
