

Imperiled Ocean: Dramatic Human Stories of Survival and Transformation Amidst a Changing Sea

The world's oceans are in a state of crisis. Rising temperatures, ocean acidification, and pollution are among the numerous challenges threatening the delicate ecological balance of our vast watery realm. However, amidst this chaos, inspiring human stories emerge, illustrating the resilience and adaptability of individuals impacted by these changes. In this article, we dive deep into the imperiled ocean, exploring gripping narratives of survival and transformation that play out beneath the waves.

1. The Fisherwoman's Fight for Survival

2. The Coral Reefs' Cry for Help

On a life raft in the Mediterranean, a teenager from Ghana wonders whether he will reach Europe alive. A young chef disappears from a cruise ship, leaving a mystery for his friends and family to solve. A water-squatting community battles eviction from a harbor in a Pacific Northwest town, raising the question of who owns the water. Imperiled Ocean is a deeply reported work of narrative journalism that follows people as they head out to sea. What they discover holds inspiring and dire implications for the life of the ocean, and for all of us back on land. As Imperiled Ocean unfolds, battles are fought, fortunes made, and lives are lost. Behind this human drama, the ocean is growing ever more unstable, threatening to upend life on land. We meet a biologist tracking sturgeon who is unable to stop the development and pollution destroying the fish's habitat, he races to learn about the fish before it disappears. Sturgeon has survived more than 300 million years on earth and could hold important truths about how humanity might make itself amenable to a changing ocean. As a fisher and scientist, his ability to listen to the water becomes a parable for today. By eavesdropping on an imperiled world, he shows a way we can move forward to save the oceans we all share.
