

# **Overcoming Dangers: Finding Camouflaged Systems, The Cause Of Many Diseases And How to Combat Them!**

## **The Hidden Threats Lurking in Plain Sight**

In today's world, an invisible enemy is constantly trying to find its way into our lives, causing havoc and leading to a myriad of diseases. We often overlook these dangers as they camouflage themselves within our surroundings, making it even more difficult to identify and combat them effectively. It's time to shed light on these hidden threats and learn how to overcome them for a healthier and safer future.

## **Unraveling the Mystery of Camouflaged Systems**

Camouflaged systems are the culprits behind many of the diseases plaguing our society. They conceal themselves cleverly, making it challenging to detect their presence until it's too late. These hidden threats can be found in various forms, such as environmental pollutants, harmful chemicals, and even certain lifestyle choices.

## **Environmental Pollutants: The Silent Killers**

From air pollution to contaminated water sources, environmental pollutants pose a significant risk to our well-being. Harmful gases, toxic chemicals, and other pollutants released into our environment can have detrimental effects on our respiratory system, immune system, and overall health. It's crucial to identify and address these threats to minimize their impact on our daily lives.

### **Harmful Chemicals: Hidden in Plain Sight**

Many everyday products we use, from cleaning supplies to personal care items, contain harmful chemicals that can penetrate our bodies and wreak havoc on our organs and systems. These chemical substances can lead to allergies, hormonal imbalances, and even serious diseases like cancer. By being aware of the potential dangers and choosing safer alternatives, we can significantly reduce our exposure to these hidden threats.

### **Unhealthy Lifestyle Choices: The Slow Poison**

Our lifestyle choices can also contribute to the camouflage of dangerous systems within our bodies. Poor nutrition, lack of exercise, excessive stress, and unhealthy habits like smoking or excessive alcohol consumption can weaken our

immune system, leaving us more susceptible to diseases. Making conscious lifestyle changes and adopting healthier practices can reverse these dangers and fortify our bodies against potential threats.

## **The Path to Overcoming Camouflaged Systems**

While the dangers of camouflaged systems are intimidating, there are effective ways to combat and overcome them. By following these essential steps, we can create a shield against hidden threats and pave the way for a healthier, disease-free life.

### **Educate Yourself: Knowledge is Power**

The first step towards overcoming camouflaged systems is to educate yourself about the potential risks lurking in your surroundings. Stay informed about environmental pollutants, harmful chemicals, and the impact of lifestyle choices on your health. By understanding these dangers, you can make informed decisions and take necessary precautions to safeguard yourself and your loved ones.

### **Adopt a Healthier Lifestyle**

Your lifestyle plays a crucial role in determining your vulnerability to hidden threats. Focus on consuming nutritious foods, engaging in regular exercise, managing stress effectively, and avoiding harmful habits. These lifestyle changes will strengthen your immune system, making it easier for your body to fight off potential diseases and camouflaged systems.

### **Create a Safe Living Environment**

Take proactive steps to create a safe living environment that minimizes exposure to environmental pollutants and harmful chemicals. Use natural cleaning products, purify your indoor air, and ensure a clean and toxin-free water supply.

Making these changes will significantly reduce the presence of camouflaged systems within your surroundings and protect your well-being.

## Spread Awareness

Knowledge is best shared, and by spreading awareness about camouflaged systems and their potential dangers, you can make a difference in the lives of others. Share this article with your friends, family, and community to help them recognize and combat hidden threats effectively. Together, we can create a ripple effect and build a healthier future for all.

Camouflaged systems may be the cause of many diseases, but armed with knowledge and taking appropriate actions, we can overcome these hidden threats. By being conscious of our surroundings, making healthier lifestyle choices, and creating safe living environments, we can protect ourselves and our loved ones from the dangers that lurk in plain sight. Let's raise awareness, take control, and pave the way for a disease-free future!

In this book Symbionts, tiny microorganisms in the blood, are presented as "the Consciousness that flows", "the unknown Miracle of Creation within us". A modification of the environment of our blood can cause a change towards a parasitic development, which, undoubtedly, ends up becoming a disease. Fortunately, restoring the original state of these parasitic growths is easy, as long as the reason for the damage to the environment is known. In this way also the related diseases disappear.

Thanks to Dark Field Microscopy of blood and Radionic Testing, Ekkehard Sirian Scheller discovered the camouflaged Candida fungi, which varied their shape, starting from the yeast of intestinal transit, adapted to the blood and no longer appeared in the shape of yeast. Due to the fermentation of glucose, extreme mycotoxins are produced, which increasingly destroy the mucosal system due to constant corrosion. As a result, many secondary diseases arose, which were generally treated as isolated diseases. Thus arose the terms "Camouflage" and, later, the "C-Forms".

Borrelia have also learned to camouflage themselves, they are even transmitted by mosquitoes, and their existence, clinically, is no longer demonstrable. The same goes for Trichomonas and Epstein-Barr Virus. More and more pathogens will learn to camouflage themselves to defend themselves from being attacked by our immune system and strong drugs. More than 20 years ago, Ekkehard Sirian Scheller, discovered how these systematic circuits were introduced into society and how they caused disease on a large scale. The "Infopathy" is a transmission of information to neutralize all the disturbed body systems, as well as the

corresponding mental processes. This occurs by restoring the original state of the Symbionts.
