To understand the Nigeria of today, we have to go back to the beginning. Like India, Nigeria could easily have morphed into three or more countries at independence in 1960. It didn't happen partly because the British colonialists didn't want it so and partly also because the emergent country was negotiated in such a way that, in the words of historian, Prof. Yakubu Ochefu, in the to the book, Nigeria is Negotiable, "...the region with the least democratic credentials ended up as the driver of a new democratic enterprise..." Whether the historical trajectory of Nigeria would have been different if the reverse had been the case is open to debate, but one thing is certain: that process did not happen by chance;

neither was it meant to be short-lived. The trouble with Nigeria is simply and squarely a failure of leadership. There is nothing basically wrong with the Nigerian character. There is nothing wrong with the Nigerian land or climate or water or air or anything else.—Chinua Achebe (The Trouble with Nigeria) Nigerians do not believe in the idea of Nigeria because they know it was somebody else's idea.—Chigozie Obioma, author, The Fishermen, in an interview with Newsweek Europe Nigeria is not a nation but a noyau, i.e., a society of inward antagonism, one held together by mutual internal antagonism, one which could not carry on if its members had no fellow members to hate. And if we want to end the troubles of the Nigerians, we must dig deeper to find the fundamental causes.—Chinweizu
