New Saucerian is honored to present Gray Barker's "The Strange Case of Dr. M.K. Jessup," the very first book ever published about the suspicious death of early UFO researcher M.K. Jessup, and his possible relationship to the Philadelphia Experiment.

Jessup's own book, "The Case For the UFO," perhaps the first to argue that UFOs were an ongoing terrestrial phenomena, had become a blockbuster, and was reprinted by the Varo Corporation, under the auspices of the U.S. Navy.

The Varo Edition contained unusual annotations by a strange man, Carlos Allende, who claimed to have witnessed the Philadelphia Experiment, and to have been tutored by Albert Einstein. Allende openly suspected Jessup of involvement in the experiment, leading to interesting interchanges, moves, and countermoves.

In these pages, Barker analyzes such correspondences, and deftly navigates the sticky terrain of Jessup's mysterious rise and fall, while raising doubts about the official story. Did Jessup really kill himself, or was it "self-murder?" Or, did Jessup kill his attacker and steal his identity? And was that attacker the real Carlos Allende?

This special 2014 edition features a fascinating by the late, eminent ufologist, Eugenia Macer-Story, as well as the original s to the 1963, 1967, and 1973 editions. Also included are new and intriguing contributions from researchers George Knapp, David Paulides, David J. Halperin, Jeffery Pritchett, Anthony Bragalia, Robert Goerman, Anna Genzlinger, and John A. Keel.
