Many Italian Americans faced the challenge of "passing" as white to gain social and economic advantages, while others actively embraced their Italian heritage and resisted assimilation. This tension between assimilation and cultural preservation shaped their racial identity in the American context.

Throughout history, the media played a significant role in shaping public perception of Italian Americans. Movies, television shows, and other forms of popular culture perpetuated stereotypes, often portraying them as violent mobsters or caricatures of their cultural traditions.

When southern Italians began emigrating to the U.S. in large numbers in the 1870s-part of the "new immigration" from southern and eastern rather than northern Europe-they were seen as racially inferior, what David A. J. Richards terms "nonvisibly" black.

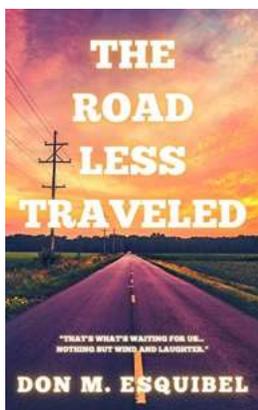

The first study of its kind, Italian American explores the acculturation process of Italian immigrants in terms of then-current patterns of European and American racism. Delving into the political and legal context of flawed liberal nationalism both in Italy (the Risorgimento) and the United States (Reconstruction Amendments), Richards examines why Italian Americans were so reluctant to influence depictions of themselves and their own collective identity. He argues that American racism could not have had the durability or political power it has

had either in the popular understanding or in the corruption of constitutional ideals unless many new immigrants, themselves often regarded as racially inferior, had been drawn into accepting and supporting many of the terms of American racism. With its unprecedented focus on Italian American identity and an interdisciplinary approach to comparative culture and law, this timely study sheds important light on the history and contemporary importance of identity and multicultural politics in American political and constitutional debate.
