Screen Reader : Supported

Enhanced typesetting : Enabled

Print length : 311 pages

Don't let their vibrant colors and small size fool you! Poison dart frogs are tiny but lethal. Found in Central and South America, these beautiful creatures pack a deadly secret. Their skin is covered with a potent toxin that can paralyze or kill their predators with just a touch.

2. The Inland Taipan

Known as the most venomous snake in the world, the inland taipan holds a lethal reputation. Located in the remote regions of Australia, this deceiving reptile possesses venom so potent that it can kill a human within just a few minutes. Be cautious when exploring the outback!

3. The Cone Snail

These seemingly innocent creatures hide a deadly weapon. The cone snail's venomous harpoon-like tooth can inject toxins that affect the nervous system, potentially leading to paralysis or even death. Beware of their alluring shells!

4. The Blue-Ringed Octopus

Don't be deceived by its small size and fascinating patterns! The blue-ringed octopus, commonly found in the Pacific Ocean, carries enough venom to kill multiple humans with just one bite. Striking fear into the hearts of divers, this creature is surely not to be underestimated.

5. The Brazilian Wandering Spider

As one of the deadliest spiders on Earth, the Brazilian wandering spider poses a considerable threat to humans. With a highly venomous bite that can cause muscle paralysis and even death, encountering this arachnid is not for the faint-hearted. Take care when venturing into the forests of Brazil!

6. The Stonefish

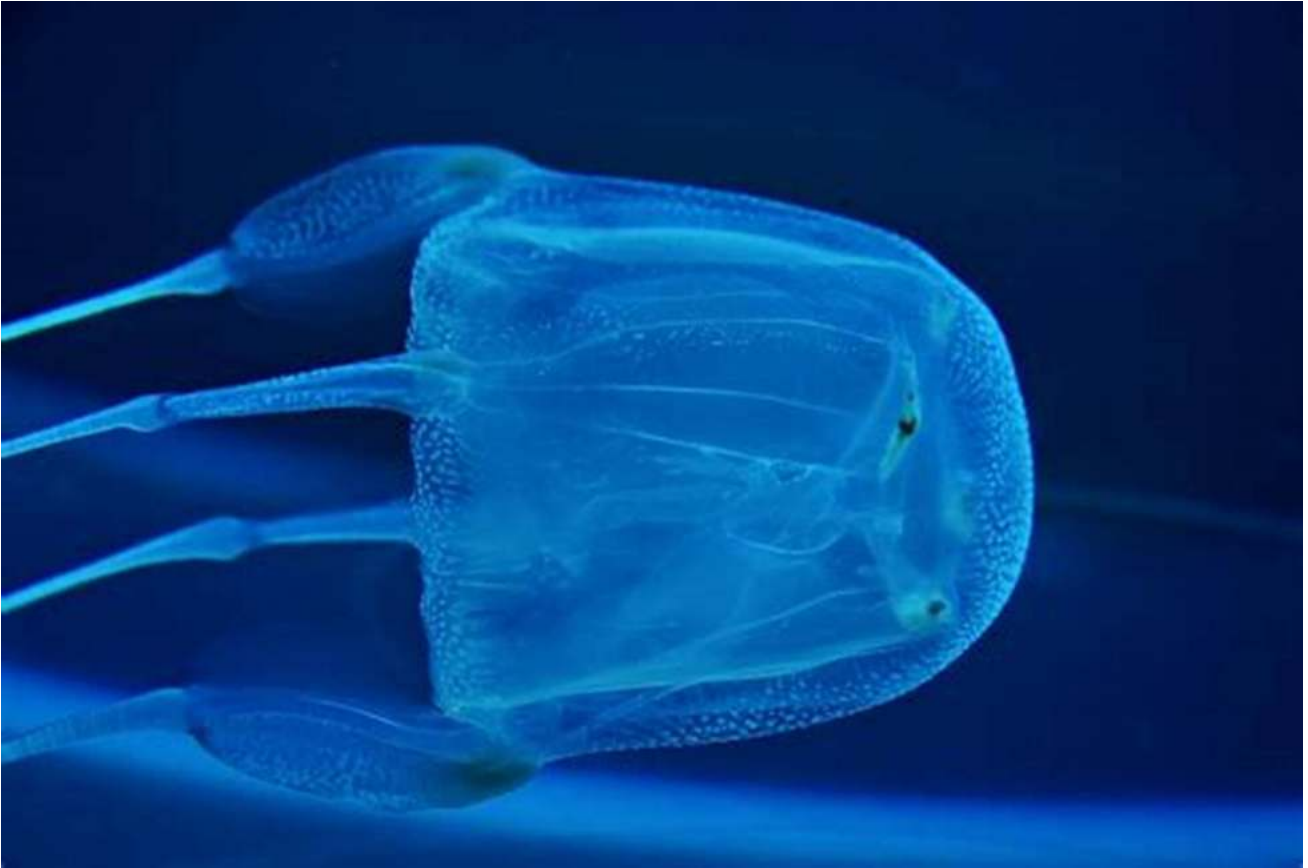

Hiding beneath the sand in the Indo-Pacific region, the stonefish perfectly blends in with its surroundings. Often called the world's most venomous fish, stepping on its venomous spines can result in excruciating pain and potentially fatal consequences.

7. The Pufferfish

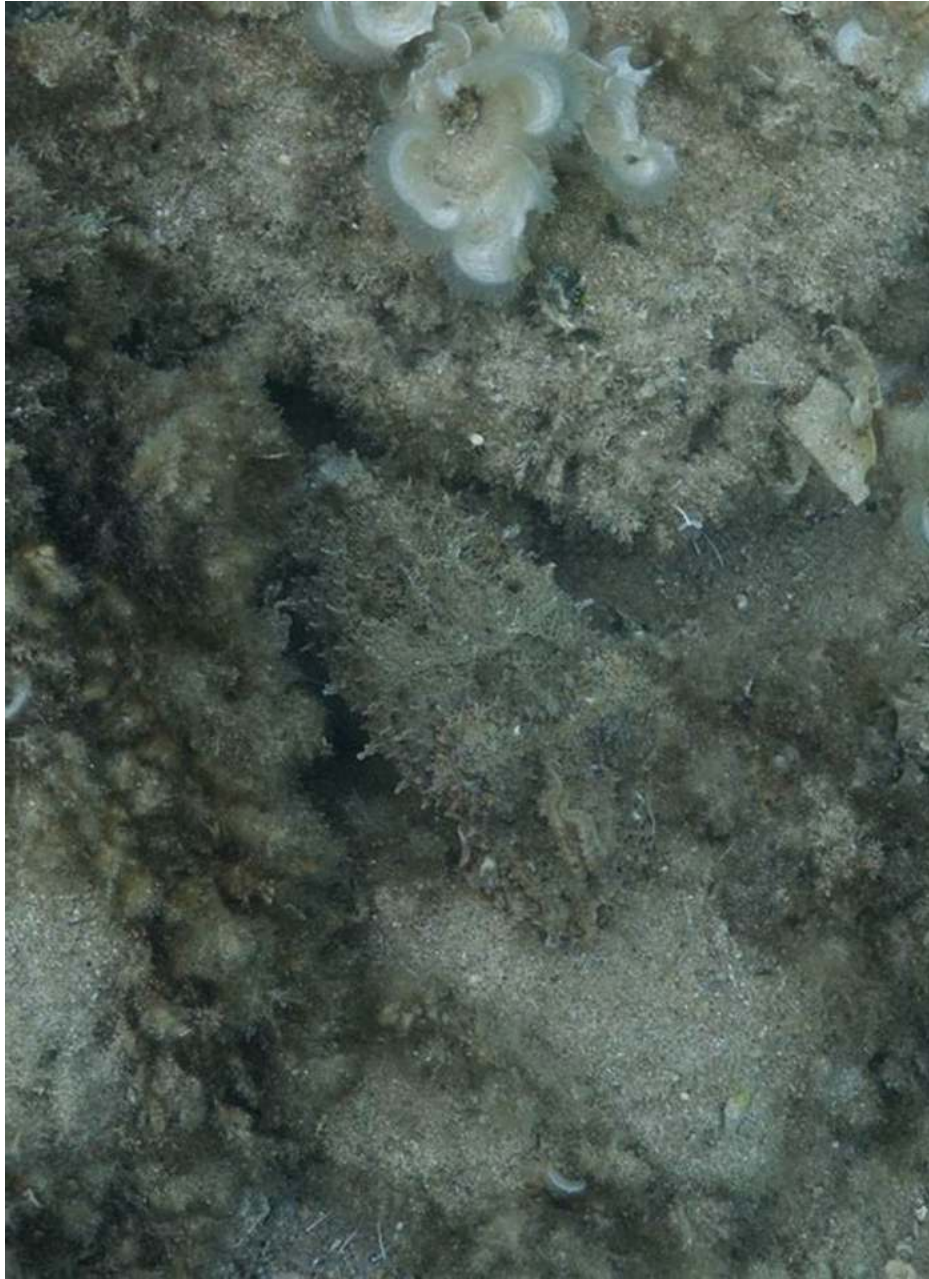

Known for their ability to inflate themselves like balloons, pufferfish might seem harmless and even cute. However, their defense mechanism holds a hidden danger. Certain species of pufferfish contain a potent toxin called tetrodotoxin, which can cause paralysis and can be lethal if ingested in large amounts. Don't be fooled by their charming appearance!

8. The Box Jellyfish

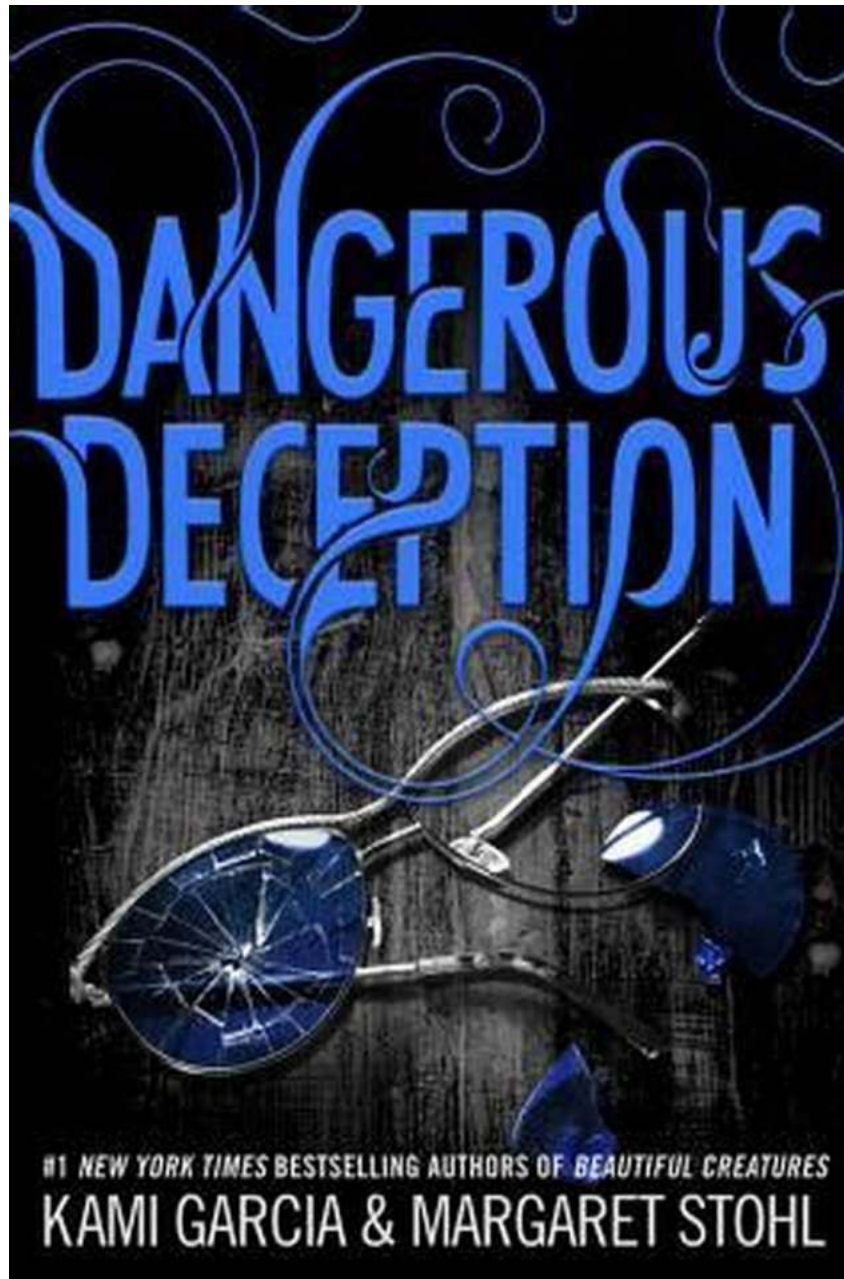

This unsettling creature possesses tentacles lined with thousands of venomous cells. Found in the waters of the Pacific and Indian Oceans, the box jellyfish is responsible for numerous deaths each year. With venom that attacks the heart, nervous system, and skin cells, it's truly a formidable opponent to encounter in the ocean.

9. The Camouflage Cuttlefish

The camouflage cuttlefish is a master of disguise. Using its remarkable ability to change color and texture, this ocean-dwelling creature can blend seamlessly into its surroundings. While it may seem harmless, don't be deceived! Its tentacles house venom that can instantly paralyze its prey, demonstrating the lethal power of deception.

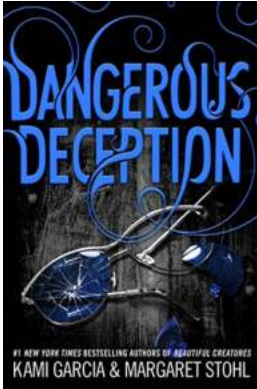

10. The Assassin Bug

Don't let its name fool you; this bug is not one to be underestimated. The assassin bug lurks in the shadows, patiently waiting to impale its unsuspecting victims with its sharp beak. It then injects a lethal saliva cocktail that dissolves its prey's insides, allowing the bug to suck it all up. Be wary of this cunning insect!

As you can see, danger often lurks where we least expect it. The animal kingdom is full of treacherous and cunning creatures that have mastered the art of

deception. From toxic amphibians to venomous predators, these dangerous animals remind us to approach nature with caution and respect. So, the next time you encounter an innocent-looking creature, remember that dangerous deception might be its deadliest weapon.

From the world of Beautiful Creatures--a dangerous new tale of love and magic continues in the sequel to Dangerous Creatures.

After a disastrous car crash outside New York City, Ridley Duchannes--Dark Caster, Siren, and bona fide bad girl--has gone missing. Her wannabe rocker and quarter Incubus boyfriend, Wesley "Link" Lincoln, was driving, and when he comes to, Ridley is nowhere to be found. The only clue is the giant raven emblazoned on the hood of the truck that hit them, which can mean only one thing: Silas Ravenwood is back. And he has Ridley.

Determined to find her, Link reunites with old friends John Breed and Liv Durand, his New York bandmates, and the mysterious Lennox Gates--who has his own reasons for tracking down Ridley. Together they travel through the Caster Tunnels and the Deep South to New Orleans, where they uncover the truth about the

infamous Ravenwood labs and exactly what Silas has been doing within those walls. By the time Link and his friends reach Ridley, she is no longer the Siren they know and love. She's something new. This time, love might not be enough to save them.

In this sequel to *Dangerous Creatures*, the bestselling spin-off of the #1 New York Times bestselling *Beautiful Creatures* novels, coauthors Kami Garcia and Margaret Stohl deliver an intoxicating blend of magic, suspense, and danger.
