

Un Témoignage de la Première Officière: A Dream Come True for Aspiring Aviators!

The Journey Begins

I remember the day when I first stepped into an airplane as a child. The rush of excitement overwhelmed me as I gazed out the window, mesmerized by the world beneath me. Little did I know that this experience would ignite a passion that would shape my future forever.

The Challenges of a Male-Dominated Industry

As I grew older, I realized that aviation was a field dominated by men. Despite the odds, I refused to let this discourage me from pursuing my dreams of becoming a pilot. I faced countless challenges along the way, from skeptical mentors to gender biases during flight training.

However, I persisted. I worked tirelessly to prove my worth, showcasing my determination, skills, and knowledge. Every obstacle I overcame fueled my motivation to break through the glass ceiling that hindered so many women in the aviation industry.

A Dream Come True

After years of hard work and dedication, I finally earned my pilot's license. The exhilaration I felt as I held that piece of paper in my hands was indescribable. From that moment on, I was ready to conquer new heights.

Becoming a first officer was a significant milestone in my career. I had the privilege of working alongside experienced captains and crew members who supported me wholeheartedly. Their guidance and encouragement played a vital role in shaping me into the professional I am today.

Challenging Stereotypes and Inspiring the Next Generation

As a first officer, I often find myself encountering surprised faces and curious questions from passengers. Many of them have never seen a female pilot before. Although these reactions remind me of the long-standing stereotypes embedded in society, they also fuel my determination to be a role model for aspiring aviators.

I take great pride in being able to show young girls that they can achieve anything they set their minds to. Through hard work, persistence, and a passion for aviation, women can break free from societal norms and succeed in male-dominated industries.

The Joy of Flying

Being a first officer is not without its challenges. The responsibility of ensuring the safety of the passengers and crew, navigating through changing weather conditions, and managing complex flight systems requires constant vigilance and expertise.

Despite the challenges, the joy and fulfillment I experience when soaring through the skies are immeasurable. The breathtaking views, the sense of freedom, and the knowledge that I am living my dream make all the hard work and sacrifices worthwhile.

My journey as a first officer has been filled with highs and lows, but ultimately, it has been an incredible adventure. Breaking barriers and challenging stereotypes has not only empowered me, but it has also paved the way for other women to pursue their dreams in the aviation industry.

If you have a passion for aviation and dream of becoming a pilot, remember that anything is possible. With determination, hard work, and unwavering belief in yourself, you can soar to new heights and make your dreams take flight.

Je me suis retournée pour jeter un dernier regard d'envie vers les troupes d'infanterie qui remontaient dans leur TTB. Pendant une fraction de seconde, j'ai songé aux conséquences d'abandonner mon unité pour les rejoindre, en espérant que personne ne le remarquerait. Mais tout le camouflage du monde n'aurait pas suffi à me dissimuler dans un bataillon uniquement composé d'hommes. J'ai couru vers mon camion et y suis montée. J'ai fait un grand sourire à mon caporal, qui me regardait depuis le siège du conducteur. Il a pointé ma joue et m'a fait remarquer que je saignais. Ignorant son commentaire, je me suis adossée au camion et ai soupiré. Puis j'ai lancé d'un ton convaincu qu'un jour, je serais dans l'infanterie. Il a simplement secoué la tête en riant, puis a engagé le camion sur la route de terre en direction du camp de base avant de dire : « Sauf votre respect, lieutenant, vous êtes complètement folle ! » À 14 ans, Sandra Perron a rejoint les cadets. Fille de militaire, elle savait déjà ce à quoi elle aspirait : tailler sa place dans une unité de combat, même si aucune Canadienne ne l'avait jamais fait. « Des femmes telles que Mme Perron non seulement disposent des qualifications nécessaires pour être d'excellentes soldates et officières, mais amènent en plus une panoplie de nouvelles aptitudes essentielles à intégrer. C'est à nos propres risques et périls que nous continuons de les tenir à distance. » — L'honorable lieutenant-général Roméo A. Dallaire (ret.)
