The Witchery of Archery was the first book in English about hunting with a bow ever published. Its full title is The Witchery of Archery: A Complete Manual of Archery. With Many Chapters of Adventures by Field and Flood, and an Appendix Containing Practical Directions for the Manufacture and Use of Archery Implements. It was the first important book about archery written in the English language since Toxophilus, which was written in 1545. It was said that Witchery "...has as much effect on archery as Uncle Tom's Cabin had on the Civil War.

When Thompson wrote The Witchery of Archery, he filled it with various stories, many of which were humorous. However, it also gave practical advice on the sport, such as the manufacturing of archery paraphernalia and how to use the equipment while hunting.

The Witchery of Archery was accredited for returning the sport of archery to public interest. Some of this was due to rifles bringing back bad memories of the

American Civil War. However, the revival also served some larger, pragmatic purpose: ex-Confederate soldiers were not allowed guns, but needed hunting to survive; archery became a convenient substitution. In addition, the late 1800s saw the last of the American Indian Wars, thus romanticizing the Native Americans and their cultures, which, in most accounts, included expert archery. In 1880, with the book less than two years old, patents relating to archery items greatly increased. More than any other book, *The Witchery of Archery* led to the increased interest in archery for the next half-century.

A year after *The Witchery of Archery* was published, Thompson was selected as the first president of the National Archery Association, largely due to the book.

James Maurice Thompson (September 9 – February 15, 1901) was an American novelist.

Raised on a Georgia plantation, Thompson first pursued a career as a lawyer. In 1871 he opened a law practice with his brother, William Henry Thompson. He was drawn away from the field of law by the success of articles and short stories published in the *New York Tribune*, *Atlantic Monthly*, and *Harper's Monthly*.

As a writer, Thompson became well known as a local colorist, his works ranging from local history to articles about archery. His first book, *Hoosier Mosaics*, published in 1875, was a collection of short stories illustrating the people and atmosphere of small Indiana towns. He followed it with a successful compilation of his published essays, *The Witchery of Archery*, which was well received for its wit and use of common language. At this same time, Thompson also published several collections of naturalistic poetry, though they weren't well received at the time.

Thompson wrote the poem "To the South" that was reprinted in George Washington Cable's influential and controversial essay, "The Freedmen's Case in Equity" in 1885. This poem expressed Thompson's reaction to the freeing of the slaves, and implied that some other Southerners were not as angry about the overturning of that institution as Northerners presumed.

Through the 1880s, Thompson moved into the realm of fiction. His early works featured the common thread of simple southern life, taken mostly from Thompson's childhood. With his 1886 semi-autobiographical novel, *A Banker of Bankersville*, he returned to his Indiana roots. Arguably his most successful and well-known novel came with 1900's *Alice of Old Vincennes*. The novel vividly depicted Indiana during the Revolutionary War. Thompson died shortly after its publication, on February 15, 1901, of pneumonia, aged 56.
